

**2010 SAMURAI Workshop on
User Requirements for Intelligent Video Systems**

Call for Participation

15th and 16th July 2010

Genova (Italy)

After first workshop held in London where the highly qualified participation of specialists from industry and academia has made it a success, we have the pleasure to announce the second Samurai End User workshop where users of surveillance technologies will be able air and discuss their needs. During the workshop Samurai initial project results will be presented and demonstrated.

You are invited to the event whether your attendance will be as a listener or as a speaker.

Presentations (20-30 minutes) are welcomed and should focus on experiences and/or problems in implementing surveillance or safety system with video analytics.

The final agenda will be published at a later date when participation and contributions will be finalized.
