

Sec-Control Finland Ltd.

Welcome

Sec-Control Finland Ltd. is a private enterprise. The company is Hi-Tech oriented and widely applies the edge-cutting technologies in the fields of security and safety. Key words are the following: crime prevention, crime detection by technical means, 24/7 surveillance, scene monitoring and real-time video analytics, body language interpretation, integration of various multi-layer security systems in all-in-one bundle as well as applied R&D. It is our goal to pro-actively maintain and insure the total well-being of our clients within our fields of expertise and our dedicated professionals.

Sec-Control Finland Ltd. is proud to announce a participation in a EU **SAMURAI**-project (*Suspicious and Abnormal behaviour Monitoring Using a network of cAmeras for sItuation awareness enhancement*) which has been recently launched under the 7th FP. Sec-Control Finland Ltd. acts as an expert in the fields of public security and related analytical methodologies of human behaviour. This edge-cutting project is planned for a period of 2008-2011 and led by Queen Mary, University of London as the project co-ordinator. The primary aim of SAMURAI is to develop and integrate an innovative intelligent surveillance system for monitoring people and vehicle activities at both inside and surrounding areas of a critical public infrastructure. The applied technology is based on the latest achievements in very high quality digital AV-techniques and artificial intelligence. There are 25 different participating organisations from 6 EU Member States and Switzerland. A consortium consists of, for example, *BAA (British Airport Authorities)*, who operates such biggest international airfields as London Heathrow, London Gatwick and Edinburgh, *Swiss Railway*, *IBM*, and one of the world's biggest defence manufactures *Defence Science and Technology Laboratory* and *QinetiQ*. More information is available on www.samurai-eu.org.
